

SSC CGL 2024 Tier 1

What all the shift papers show when read together

Computed from 5 shift papers | prepared 29.08.2026

Why this document exists

A question paper on its own is the same file a dozen sites host, and copying it helps nobody. This document is the part that is missing: what the 5 shift papers say when they are read together. Every number below is counted from the papers themselves, not estimated, and where the paper does not support a claim this document says so rather than filling the gap.

Shift by shift, as counted

Paper	Questions	Sections	Pages
ssc cgl 2024 tier1 sep09 shift1	100	4	40
ssc cgl 2024 tier1 sep09 shift2	100	4	43
ssc cgl 2024 tier1 sep09 shift3	100	4	40
ssc cgl 2024 tier1 sep11 shift1	99	4	42
ssc cgl 2024 tier1 sep13 shift1	100	4	41

Question counts run 99, 100 across the shifts. A paper whose count differs from the rest is usually a text-layer artefact rather than a different paper, so treat the mode as the real length.

Section split across all shifts

Section as printed on the paper	Questions	Share
General Intelligence and Reasoning	100	20%
General Awareness	100	20%
English Comprehension	100	20%
Quantitative Aptitude	99	20%
Section 1 (names not readable in this file)	25	5%
Section 2 (names not readable in this file)	25	5%
Section 3 (names not readable in this file)	25	5%
Section 4 (names not readable in this file)	25	5%

Across every shift counted, General Intelligence and Reasoning carries the largest block at 100 questions. That share is the one worth matching in practice time; the smaller sections reward accuracy more than volume.

Questions repeated between shifts

Across 462 question stems read from 5 shifts, 15 are word-for-word identical in more than one shift, and 41 share the wording while the numbers change. Those are different findings and are counted separately here, because a reused template is normal in a multi-shift exam while a reused question is not.

Finding	Counted from the papers
Identical questions	15 of 462 stems
Same wording, new numbers	41 of 462 stems
What it means for practice	The template is what carries over between shifts. Solving an old shift trains the pattern you will meet again; it will not hand you the same numbers.

Q.22 What will come in place of the question mark (?) in the following equation, if $2+3$ and $4+5$ are interchanged and 2×3 and $4 \div 5$ are interchanged? $1604 \times 4 ? 525 \div 5 + 73 = ?$

ssc cgl 2024 tier1 sep09 shift1 also in ssc cgl 2024 tier1 sep09 shift2

Q.25 What will come in the place of ??? in the following equation, if $2+3$ and $4+5$ are interchanged and 2×3 and $4 \div 5$ are interchanged? $4 \div 6 + 91 \times 7 ? 5 = ?$

ssc cgl 2024 tier1 sep09 shift1 also in ssc cgl 2024 tier1 sep09 shift2

Q.21 Select the most appropriate option to fill in blank number 1.

How to use this

Take one shift under timed conditions with the marking above applied, then count your errors by section rather than in total. The section split on page one tells you what each error is worth in the real paper: a mistake in the largest block costs more than the same mistake in the smallest. Work the sections in descending share, and only then go back for the small ones.
